

PV VALVES AND TANK VENTING PRODUCTS

TOP SAFE SUPER-ISO

CAST IRON CONSTRUCTION SS316 INTERNALS.

SIMPLE DEAD WEIGHT PRINCIPLE.

TOPSAFE high velocity PV valves are high performance dead-weight based valves that meet all international and USCG requirements. The valves are available in a large selection of size and material choice and have a test handle for easy valve verification.

Tank high-velocity pressure vacuum valves are critical safety devices. For over 25 years, our simple but technologically innovative deadweight principle PV valves have ensured safe operation on tank vessels worldwide. Through our long-term partnership with a world class manufacturer TankTech, each of our high quality valves can be supplied in a variety of sizes and materials, all quality-built to the latest IMO and Class requirements.

We also offer complete vent stack as well as flame screens for gas freeing operations. Our engineers have set the maritime industry standard - from the basic and simple tools that keep you in business day to day, to the highly complex and groundbreaking methods, designs and systems unmatched by anyone else. Our options include a gas free vent cover, and an all SS316L construction.
