

CONTROL PANELS AND DISPLAYS

GUARD LEVEL® MTDE

ALL UNITS CHANGE TO TANK IN LEVEL ALARM, AND THEN AFTER PRESET TIME DEFAULT BACK TO ASSIGNED TANK AFTER ACKNOWLEDGMENT.

LARGE LED DISPLAYS ARE READABLE TO 30FT OR MORE FOR ULLAGE, LEVEL, VOLUME, PRESSURE, TANK TEMPERATURE, AND INDEPENDENT HIGH LEVEL (HL) AND OVERFILL LEVEL (HHL) ALARMS.

TANKERMAN CAN READ AND ACKNOWLEDGE ALARMS OF ALL TANKS FROM ONE UNIT.

EXPLOSION PROOF CLASS 1, DIV. 1 DEVICE.

CAST BRONZE HOUSING AND STAINLESS SUN SHADE.

POWERED BY 24VDC SOURCE.

The GUARD LEVEL® Multi Tank Display Explosion-Proof (MTDE) is a heavy-duty explosion-proof remote display when used with existing GUARD LEVEL® Master Control Unit (MCU) and GUARD LEVEL® Deck Alarm Cabinet+ (DAC+) control panels providing a complete tank and alarm display in hazardous areas. Smartly designed large LED displays are readable up to 30 feet or more for ullage, level, volume, pressure, tank temperature and independent High Level (HL) and Overfill Levels (HHL).

Multiple MTDE's can be daisy-chained with a 4C cable (Power & Data) and are ideal for on-deck or manifold area displays. Acknowledging the alarm from any MTDE or the unit can be configured to only accept acknowledgment from the MTDE located near the tank in alarm.
