

PORTABLE PRODUCTS AND ACCESSORIES

GUARD LEVEL® PTU

PORTABLE HIGH AND OVERFILL ALARM TESTING UNIT FOR SERIES CONNECTED ALARM SENSORS.

INDIVIDUAL LED INDICATION FOR SAFE AND ALARM CONDITION.

USER REPLACEABLE ALKALINE BATTERIES.

DURABLE HIGH IMPACT MOLDED CONSTRUCTION.

WORKS WITH ANY MAKERS SENSORS CONNECTED TO API RECEPTACLE.

DUAL TONE PIEZO BUZZER.

RECOMMENDED FOR TESTING PRIOR TO ARRIVING AT LOADING TERMINAL.

The GUARD LEVEL® Portable Testing Unit (PTU) is a rugged, compact, handheld, battery-powered High Level (HL) and Overfill Level (HHL) alarm tester for U.S. inland and coastal barges. This mobile device is ideal for verifying that the barge level alarms are in the correct working order before arriving at the terminal. This unit has series-connected alarm sensors terminating in port and starboard Application Programming Interface (API) shore alarm connectors. The PTU's LED indicators and dual-tone piezo buzzer activate when alarm sensors are tested.

In the barge industry, hand-held portable devices for testing level alarms and measuring cargo temperatures make monitoring precious cargo possible in any environment. Bergan Marine Systems has a long history of engineering devices that are Intrinsically Safe, battery-operated, and proven reliable in every category.
